RE: Reference for Kenesary Company LLP (Republic of Kazakhstan)

Dear Sir/Madam,

In 2015 the Kenesary Company LLP (Republic of Kazakhstan) became a member of the 'Prime Business Destinations' promotion project, led by the Europe Business Assembly (EBA). Kenesary services meet our international standards and modern environmental requirements through their attentive approach to the market requirements. Their capacity for change, highly qualified employees, as well as resource and communication possibilities suggest potential for steady growth and a continued positive perception of the company brand as a whole.

Kenesary Company is an international health environmental organisation specialising in providing research services to stakeholders in both the public and private sector, including international oil and gas companies such as 'Agip KCO', 'North Caspian Operating Company b.v.', 'Chevron Texaco', 'British gas', 'Arthur D. Little' and others.

If you have any further questions please do not hesitate to contact me.

Yours sincerely,

Sarah Osland
Events Director
